

ADSY Technologies

Support Process, Escalation & SLA

Support Process

ADSY Technologies provides structured support to ensure client issues are addressed quickly and consistently, whether during the post-launch warranty period or under an active maintenance plan.

How to Reach Support

- Email: support@adsytechnology.com (recommended for all non-urgent issues)
- Phone: +91 771 400 2200 (business hours, for urgent matters)
- WhatsApp Business: +91 98765 43210
- Active maintenance plan clients may also have a dedicated support channel (Slack/Teams) set up during onboarding.

What to Include in a Support Request

- A clear description of the issue and what you expected to happen instead.
- Steps to reproduce the issue, if applicable.
- Screenshots or screen recordings, where helpful.
- The approximate date/time the issue occurred.
- Your project name or reference number.

Support Ticket Lifecycle

Stage	Description
1. Submitted	Client submits a support request via email, phone, or dedicated channel.
2. Acknowledged	Our team confirms receipt and assigns a priority level based on impact.
3. Investigating	The issue is reproduced and diagnosed by our technical team.
4. In Progress	A fix or resolution is actively being implemented.
5. Resolved	The fix is deployed and verified. Client is notified with a summary.
6. Closed	Ticket is closed after client confirmation, or automatically after 5 days of no response.

Escalation Policy

If a support issue is not resolved within the expected timeframe, or is critical enough to require immediate attention, clients can escalate through the following levels.

Level	When to Use	Contact
Level 1 - Standard Support	Routine bugs, questions, minor issues	support@adsytechnology.com
Level 2 - Priority Escalation	Issue unresolved beyond expected SLA response time, or significant business impact	Project Manager (direct contact provided during onboarding)
Level 3 - Critical Escalation	Production outage, data loss risk, security incident	+91 771 400 2200 (call directly) and email flagged URGENT

Critical escalations (Level 3) are treated as top priority regardless of time of day for clients on active maintenance plans with a Premium support tier. Standard-tier clients receive best-effort response outside business hours.

Service Level Agreement (SLA)

Response and resolution time targets vary based on issue priority and your maintenance plan tier. These are target response times, not guaranteed resolution times, since resolution time depends on issue complexity.

Priority	Definition	Basic Plan	Standard Plan	Premium Plan
Critical	Production down, data loss, security breach	Next business day	Within 8 hours	Within 2 hours
High	Major feature broken, significant user impact	2 business days	Within 1 business day	Within 4 hours
Medium	Minor bug, limited impact	3-5 business days	2 business days	Next business day
Low	Cosmetic issue, general question	5-7 business days	3 business days	2 business days

Clients without an active maintenance plan are supported on a best-effort, billable basis with no formal SLA commitment. See our Pricing document for maintenance plan details and how to subscribe.
